

## Electrical Design

When it comes to designing electrical plant we have experience in a diverse range of industry from oil and gas, dairy, rendering, meat processing, to geo thermal generation.

Our specialist expertise include PLC control design, switch board design and motor control design, using a wide range of equipment including Telemecanique, PDL, Rockwell, Omron, Wonder Ware, Intech.

We use AutoCAD Electrical to produce our designs.  
This software has been proven to be,

- \* 84% faster when creating new designs
- \* 73% faster when editing existing designs

It includes libraries of all the major equipment suppliers found in the industry today and is continually updated.
